**Forecast for Saturday 07 Nov 2020**

**Weather:** Starting with widespread low cloud and mist, and hill fog, but some clear spells possibly in the west. Remaining mostly cloudy in the east while some good spells of sunshine develop in the west, although cloud in the west does increase towards dusk. Cloudy this evening with a little rain at times by midnight.

**Chance of cloud free mountain/hill tops above 600m:** Zero becoming 40% across eastern areas, but 30% increasing 70% across western areas, with cloud above 300m then rising a little to above 450 m. Becoming zero across much of the Brecon Beacons this evening.

**Visibility:** Moderate or poor, and less than 1KM with mist, and less than 500m with hill fog. Locally improving good this afternoon across western areas.

| **Freezing Level*** | 2600m | 2600m | 2500m | 2700m | 2800m | 2800m | 2800m |

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

In some western valleys the temperature could reach 16C this afternoon.

**Recent rainfall:** measured at Neuadd: altitude 353m

| Recorded at | Last 24 hours: | Last 48 hours: | Last 72 hours: |
|---|---|---|---|
| 03:00 on Sat 07 Nov 2020 | 0.2mm | 0.4mm | 0.6mm |

**Forecast for Sunday 08 Nov 2020**

**Weather:** Cloudy with heavy rain quickly arriving, but then easing later in the night to become light and patchy, then clearing away northeastwards after dawn. Cloudy conditions will follow, although some brighter spells are likely in the afternoon, especially across more northern hills. Cloudy through the evening with a chance of patchy light rain arriving.

**Maximum wind:** Southeasterly 10-15mph gusts 25 mph.

**Chance of cloud free mountain/hill tops above 600m:** Zero overnight and through most of the morning, with persistent cloud above 400m rising to 500m and becoming more occasional. From late morning the chance increases to 80% as most cloud lifts above the summits. Through the evening decreasing close to zero, as cloud lowers to 450m again.

**Visibility:** Moderate or poor, and less than 1KM with mist, and less than 500m with hill fog. Temporarily improving locally good from late morning and through the afternoon.

**Temperature:** **Valleys:** Plus 8 or 9 Celsius at dawn rising to 16 Celsius by day.
**At 600m:** Plus 9 Celsius
**Freezing level:** Above the summits
